It will be a good learning experience for all students after visualising the topic through learning on projector, so there is more need to teach on projector rather than only mouth-speaking skills.	1) No placement opportunities actually provided. 2) More grammatical mistakes by professors and very bad English speaking skills which causes students to lose their interest in the subject.

Use of reference books should be encouraged rather than notes. And awareness regarding our climate, environment and compassion to animals should also be included frequently in lectures as it would serve the purpose of teaching which is a very noble job and would help to create a better future
