

Department of Electronics & Telecommunication Engineering

E - CLUB

E-Club established in 2019 in A.G. Patil institute of Technology, Solapur headed by faculty coordinator and student secretary and his team members. The club aims at bringing the gap between Institute and Industry by the innovative ideas and startups.

What We Do

- We help students to acquire and develop new skill-sets by conducting various lectures and workshops.
- We motivate and guide them to come up with innovative projects that tackle real-life problems.
- We provide resources and the technical know-how to realize and shape their projects.
- Through regular meetings and sessions we improve students' technical and leadership skills.

Objective of the club

The Electronics Club aims to provide students a platform and resources to gain practical skills and realize projects. We strive to teach and help students acquire new skills in an era of rapidly evolving technology. We believe in coming up with projects that are innovative and tackle real life problems. To achieve these objectives we conduct various lectures, workshops and mentorship programs to help students realize their projects. The mission of the club is to expose students to challenges and new technologies in the field of electronics and thus to nurture and develop their skill set in this arena. Regular meetings and mentorship programs will definitely help students to achieve their goals.
